

Name Surname

X is a mechanical engineer with project experience in the automotive industry. He has worked in design automation and optimization, product design and development, strength and fatigue calculations, finite element simulations, material development during his studies via industrial and university projects. He is passionate about assisting the industries with his technical competence to achieve their product requirements.

X is an optimistic, curious, quality-customer oriented person with strong communication skills. He is result-driven, likes taking up challenging responsibilities and working on them in an organized and methodological way. His mindset is to learn new things every day so that he can develop as a person and engineer. From X's previous experiences within the automotive industry he takes with him a keen interest for autonomous drive within this fast-growing market.

Roles

Mechanical Engineer, Test Engineer, CAE Engineer, Design Engineer, Software developer, System Design Engineer, Product developer.

Employer

| Company | Date | Role |
|----------------------|---------------------|-----------------|
